

Legionella Management in Cold and Hot Water Systems: One Day Proficiency Training Course

Who should attend?

Anybody with responsibilities for indoor water systems, whether operation, maintenance or management. It is also particularly useful to enable smaller businesses to comply.

Course Objectives and Expected Outcomes

To provide delegates with a grounding in legionella and its control in cold and hot water systems.

Having attended the course delegates should:

- Understand legionella bacteria, the sources and health risks
- Know the legal requirements, guidance and good practice
- Know the likely risks, what needs to be done and what would be excessive
- Understand clearly the responsibilities and the role of Competent Help
- Have an understanding of and strategy for managing incidents and crises including outbreaks of Legionnaires' Disease
- Pass the BOHS P901 exam

Delegates will receive a comprehensive training pack and revision notes.

Delegates who pass the BOHS examination will be issued with a certificate of proficiency recognised by the Health and Safety Executive.

Course Overview

- Introduction and history of the legionella
- Legislation and guidance
- Risk assessment of systems
- Operational control
- Outbreak investigations

The course includes desktop exercises.
