

NEBOSH National General Certificate

Who should attend?

Managers, supervisors and staff from all types of organisations who need a broad understanding of health and safety issues

Course Objectives and Expected Outcomes

The NEBOSH National General Certificate is a highly regarded qualification designed to help those with health and safety responsibilities (e.g. managers, supervisors and employee representatives) to discharge more effectively their organisational duties and functions.

The certificate helps them manage risks effectively. Many people take the NEBOSH National General Certificate as a first step in a career in health and safety. It provides a valuable overview, and is a sound basis for further professional study.

Having attended the course delegates should be able to:

- Identify common hazards and unsafe practices in the workplace and advise on appropriate remedial actions.
- Investigate incidents and accidents, prepare reports to prevent recurrence.
- Advise on action to minimise fire risks.
- Assist in the preparation, review and monitoring of safety policy and procedures, including training, audits and safety committees.
- Identify the main requirements of health, safety and welfare legislation and codes of practice.
- Maintain records via an information system to advise management on best practice.

NEBOSH accredits the course and all successful candidates receive certification.

Course Overview

The qualification is divided into three units, each of which is assessed separately:

- Management of Health and Safety (NGC1)
- Controlling workplace hazards (NGC2)
- Health and safety practical application (NGC3)

Duration

The duration of study is normally 87 hours plus private study and background reading. In order to provide delegates with the maximum opportunity to pass, Tetra would run the course for 1 day a week over 12 weeks (plus two examination days).
